WE BETTER THE BUSINESS OF MEDICINE

## Key Features

- Secure (256 bit encryption) online HIPAA-compliant SaaS solution for Chart management.
- Existing Interfaces to HST and SourceMed. New interfaces can be developed easily.
- **Exception Reporting to track pending or missing documents.** An unique feature that tracks forms that have not been scanned back into the patient Charts. **Smart labelling automatically renames and stores the scanned documents in appropriate tabs in the Patient Chart.**
- Self-managed, customizable Forms and Templates setup. Use existing Forms or create new Forms anytime. **Setup Forms to populate with any data from the scheduling interface.**
- Admin access to customize user permissions based on roles for workflows.
- **Intelligent barcode scanning and label printing** process - scan paper in any order and stack size.
- Customizable **Tabs** in Charts.
- **Archive and Search** - All Charts are available anytime and anywhere.
- **Print Options** - By Time, By Room#, By Surgeon, **One-sided or Duplex**, etc.
- Document action history for tracking and compliance.
- Transcribed documents are automatically in the Patient Charts after being e-signed.
- **Fax Option** - Fax documents from patient charts with just a few clicks. Manage incoming faxes online and save to patient chart directly without scanning.

## Benefits for ASCs

- Easy to implement with **minimal training** - All you need is a PC, printer and scanner to get started!
- **Improved productivity and better patient care** – Reduce time spent on scanning, printing, searching, and tracking.
- **Browser and Device Independent solution** - A true **Plug and Play** solution. Use any browser and any device (iPad, PC, etc.).
- Reduction or elimination of paper storage costs. **Huge savings in Storage and Retrieval costs.**
- Save on printing and labor costs. **Change or create new Forms and Chart Packs anytime.**
- **Guaranteed savings of thousands of dollars** over your existing solutions.
